NOTES FORMING PART OF THE SPECIAL PURPOSE FINANCIAL STATEMENTS OF ELECTRICITY DISTRIBUTION DIVISION OF KANAN DEVAN HILLS PLANTATIONS COMPANY PRIVATE LIMITED FOR THE YEAR ENDED MARCH 31, 2025

1. **Background**

The Kerala State Electricity Regulatory Commission has granted License to Kanan Devan Hills Plantations Company Private Limited (KDHP) (hereinafter "the Licensee") for carrying out the business of distribution of electricity within the area of supply as defined in the said License. The License came into effect from July 1, 2007 and will remain in force for 25 years from that date, unless revoked earlier in accordance with the provisions of the Electricity Act, 2003.

2. **Significant Accounting Policies**

2.1 **Basis of Accounting and preparation of financial statements**

The financial statements of the Licensee company have been prepared as per the format issued by Kerala State Electricity Regulatory Commission vide Notification No.2076/F&T/2017/KSERC dated October 5, 2018. The financial statements have been prepared based on accrual basis of accounting under the historical convention unless otherwise stated in the statements. The accounting policies adopted in the preparation of the financial statements are consistent with those followed in the previous year. These special purpose financial statements of the Licensee have been extracted from the audited financial statements of the Company for the year ended March 31, 2025.

2.2 **Use of estimates**

The preparation of the financial statements is in conformity with the generally accepted accounting principles in India, which requires the Management to make estimates and assumptions considered in the reported amounts of assets and liabilities and the reported income and expenses during the year. The Management believes that the estimates used in the preparation of the financial statements are prudent and reasonable. Future results could differ due to these estimates and the differences between actual results and the estimates are recognised in the periods in which the results are known/materialize.

2.3 **Cash flow statement**

Cash flows are reported using the indirect method, whereby profit / (loss) before extraordinary items and tax is adjusted for the effects of transactions of non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from operating, investing and financing activities of the Licensee are segregated based on the available information.

2.4 **Depreciation**

Depreciable amount for assets is the cost of an asset or other amount substituted for cost, less its estimated residual value.

Depreciation on Fixed Assets is provided under Straight Line Method by applying rates as defined by the Kerala State Electricity Regulatory Commission Notification.

2.5 **Revenue Recognition**

Income from consumers including own consumption of Electricity is recognized as per applicable tariff approved by the Kerala State Electricity Regulatory Commission.

2.6 **Interest Income**

Interest on KSEB deposit is recognized on accrual basis.

2.7 **Fixed Assets**

Fixed Assets are carried at cost less accumulated depreciation/ impairment losses, consumer contribution, capital subsidies and grants if any. The cost of fixed assets comprises its purchase price net of any trade discounts and rebates, any import duties and other taxes (other than those subsequently recoverable from tax authorities), any directly attributable expenditure on making the asset ready for its intended use, other incidental expenses and interest on borrowings attributable to acquisition of qualifying fixed assets up to the date the asset is ready for its intended use. Subsequent expenditure on fixed assets after its purchase/completion is capitalised only if such expenditure results in an increase in future benefits from such assets beyond its previously assessed standard of performance.

Assets purchased but not yet ready for their intended use are treated as Capital work- in - progress and are carried at cost comprising direct cost and related incidental expenses.

2.9 **Expenditure**

a) Direct expenditure relating to the Electricity Distribution Division is being reckoned as per information available from the code allotted for the same in the books of KDHP.

b) There has been no allocation of Corporate Office Overheads except for employee benefits expense of Management Staff who are directly involved in the Electricity Distribution business in the proportion of the efforts.

2.12 **Impairment of Assets**

The carrying values of assets / cash generating units at each balance sheet date are reviewed for impairment if any indication of impairment exists.

If the carrying amount of the assets exceed the estimated recoverable amount, an impairment is recognized for such excess amount. The impairment loss is recognized as an expense in the Profit and Loss Account, unless the asset is carried at revalued amount, in which case any impairment loss of the revalued asset is treated as a revaluation decrease to the extent a revaluation reserve is available for that asset.

The recoverable amount is the greater of the net selling price and their value in use. Value in use is arrived at by discounting the future cash flows to their present value based on an appropriate discount factor.

2.13 **Provisions**

A provision is recognized when the Licensee has a present obligation as a result of past events and it is probable that an outflow of resources will be required to settle the obligation in respect of which a reliable estimate can be made. Provisions (excluding retirement benefits) are not discounted to their present value and are determined based on the best estimate required to settle obligation at the balance sheet date. These are reviewed at each balance sheet date and adjusted to reflect the current best estimates.

Note: The Income Tax Department has always allowed the Electricity Operations of the Petitioner as an integrated part of the tea business based on the Orders of the Appellate Tribunal and hence all incomes/losses under the operations are considered as tea income or loss under Rule 8 of the Income Tax Act, 1962. Considering the tea operations are a loss in AY 23-24, there is no income tax liability to be allocated for the electricity operations.
